

PRESS RELEASE
FOR IMMEDIATE DISTRIBUTION

Capital Equipment Leasing Now Available through eNPure Process Systems, Inc.

Cranston, RI (January 14, 2010) - eNPure Process Systems Inc., a value added engineering and manufacturer of water treatment systems for industrial applications, is pleased to announce their new capital equipment leasing program now available to clients through MBS Leasing. The new leasing program is an ideal alternative to budgeting for the expense of new equipment purchases. Steven Bloom, company President feels this is a productive response to the current economy driven market place. "With traditional bank financing curtailed," explains Steven, "our leasing program allows our customers to procure equipment to improve their productivity or expand production, while matching costs savings or revenue enhancements with the equipment financing cashflow."

There are many advantages to leasing equipment, especially in this economic environment. With leasing there is no large initial cash outlay, minimal or no down payment and it helps to preserve cash flow while allowing companies to budget for other expenses.

Leasing provides distinct tax benefits and preserves bank credit lines. Our leasing rates are competitive and comparable to bank financing. Companies can enjoy the benefits of keeping other lines of credit open and at the end of the lease term purchase the equipment outright for a nominal charge.

For more information on eNPure Process Systems Inc, or our newly established leasing program, please visit our website, www.enpureinc.com or contact Steven Bloom at 401-447-3976, Fax: 866-697-6563 email: steven_bloom@enpureinc.com
